The purpose of this Issue Paper is to request approval from the Board to file proposed rules (2nd Supplemental CR 102) to implement 2015 marijuana legislation in **Chapter 314-55 WAC Marijuana Licenses, Application Process, Requirements and Reporting**.

New rules and revisions to current rules are needed to implement the following legislation that passed during the 2015 legislative session:

A CR 102 with proposed rules was originally filed with the Code Reviser's Office on September 23, 2015. Six public hearings were held around the state to obtain input from stakeholders on the proposed rules. Based on comments from stakeholders a Supplemental CR 102 with proposed rules was filed with the code Reviser's Office on January 6, 2016. A public hearing was held on February 10, 2016. The board received many thoughtful comments from our stakeholders. WAC 314-55-097 Marijuana waste disposal—Liquids and solids.

(1) Solid and liquid wastes generated during marijuana production and processing must be stored, managed, and disposed of in accordance with applicable state and local laws and regulations.

(2) Wastewater generated during marijuana production and processing must be disposed of in compliance with applicable state and local laws and regulations.

(3) Wastes from the production and processing of marijuana plants must be evaluated against the state's dangerous waste regulations (chapter 173-303 WAC) to determine if those wastes designate as dangerous waste. It is the responsibility of each waste generator to properly evaluate their waste to determine if it (~~designates~~) is designated as a dangerous waste. If a generator's waste does designate as a dangerous waste, then that waste(s) is subject to the applicable management standards found in chapter 173-303 WAC.

(a) Wastes that must be evaluated against the dangerous waste regulations include, but are not limited to, the following:

(i) Waste from marijuana flowers, trim and solid plant material used to create an extract (per WAC 314-55-104).

(ii) Waste solvents used in the marijuana process (per WAC 314-55-104).

(iii) Discarded plant waste, spent solvents and laboratory wastes from any marijuana processing or quality assurance testing.

(iv) Marijuana extract that fails to meet quality testing.

(b) Marijuana wastes that do not designate as dangerous shall be managed in accordance with subsection (4) of this section.

(c) A marijuana plant, usable marijuana, trim and other plant material in itself is not considered dangerous waste as defined under chapter 173-303 WAC unless it has been treated or contaminated with a solvent.

(4) Marijuana waste that does not designate as dangerous waste (per subsection (3) of this section) must be rendered unusable following the methods in subsection (5) of this section prior to leaving a licensed producer, processor, or laboratory. Disposal of the marijuana waste rendered unusable must follow the methods under subsection (6) of this section.

(a) Wastes that must be rendered unusable prior to disposal include, but are not limited to, the following:

(i) Waste evaluated per subsection (3) of this section and determined to not designate as "Dangerous Waste."

(ii) Marijuana plant waste, including roots, stalks, leaves, and stems that have not been processed with solvent.

(iii) Solid marijuana sample plant waste possessed by third-party laboratories accredited by the ((board)) WSLCB to test for quality assurance that must be disposed of.

(iv) Other wastes as determined by the ((LCB)) WSLCB.

(b) A producer or processor must provide the ((board)) WSLCB a minimum of seventy-two hours notice in the traceability system described in WAC 314-55-083(4) prior to rendering the product unusable and disposing of it.

(5) The allowable method to render marijuana plant waste unusable is by grinding and incorporating the marijuana plant waste with other ground materials so the resulting mixture is at least fifty percent nonmarijuana waste by volume. Other methods to render marijuana waste unusable must be approved by ((LCB)) the WSLCB before implementation.

Material used to grind with the marijuana falls into two categories: Compostable waste and noncompostable waste.

(a) Compostable mixed waste: Marijuana waste to be disposed as compost feedstock or in another organic waste method (for example, anaerobic digester) may be mixed with the following types of waste materials:

(i) Food waste;

(ii) Yard waste;

(i) Paper waste;

(ii) Cardboard waste;

(iii) Plastic waste;

(iv) Soil; or

(a) Disposal of the marijuana waste rendered unusable may be delivered to a permitted solid waste facility for final disposition. Examples of acceptable permitted solid waste facilities include:

(i) Compostable mixed waste: Compost, anaerobic digester, or other facility with approval of the jurisdictional health department.

(ii) Noncompostable mixed waste: Landfill, incinerator, or other facility with approval of the jurisdictional health department.

(b) Disposal of the marijuana waste rendered unusable may be managed on-site by the generator in accordance with the standards of chapter 173-350 WAC.

(c) A record of the final destination of marijuana waste rendered unusable.

NEW SECTION

WAC 314-55-101 Sampling protocols. (1)(a) To ensure that quality assurance samples submitted to certified third-party labs are representative from the lot or batch from which they were sampled as required in RCW 69.50.348, licensed producers, licensed processors, certified third-party laboratories, and their employees must adhere to the following minimum sampling protocols.

(b) Samples must be deducted in a way that is most representative of the lot or batch and maintains the structure of the marijuana sample. Licensees, certified third-party laboratories, and their employees may not adulterate or change in any way the representative sample from a lot or batch before submitting the sample to certified third-party laboratories. This includes adulterating or changing the sample in any way as to inflate the level of potency, or to hide any microbiological contaminants from the required microbiological screening such as, but not limited to:

(i) Adulterating the sample with kief, concentrates, or other extracts;

(ii) Treating a sample with solvents to hide the microbial count of the lot or batch from which it was deducted. This is not meant to be construed as prohibiting the treatment of failed lots or batches with methods approved by the WSLCB; and

(iii) Pregrinding a flower lot sample.

(2) **Sampling protocols for all marijuana product lots and batches:** The deduction of all quality assurance samples must adhere to the following sampling protocols:

(a) All samples must be taken in a sanitary environment using sanitary practices and ensure facilities are constructed, kept, and maintained in a clean and sanitary condition in accordance with rules and as prescribed by the Washington state department of agriculture under chapters 16-165 and 16-167 WAC.

(b) Persons taking samples must wash their hands prior to deducting samples from a lot or batch, wear gloves while preparing or deducting the lot or batch for sampling, and must use sanitary utensils and storage devices.

(c) Samples must be placed in a sterile plastic or glass container, and stored in a location that prevents the propagation of pathogens and other contaminants. This includes low light levels, mild temperatures, and low humidity environments.

(d) The licensee shall maintain the lot or batch from which the sample was deducted in a secure, cool, and dry location to prevent the marijuana from becoming contaminated or losing its efficacy.

(3) **Additional sampling protocols for flower lots:**

(a) Licensees or certified third-party labs are required to deduct four separate samples from each marijuana flower lot in order to ensure representativeness of the lot. The four samples must be of equal weight, not less than one gram each, and the cumulative weight of the four samples may not be more than the maximum allowed in WAC 314-55-102.

(b) The four separate samples must be taken from different quadrants of the flower lot. A quadrant is the division of a lot into four equal parts. This may be done visually or physically, but must be done in a manner that ensures the samples were deducted from four evenly distributed areas of the flower lot.

(c) The four separate samples may be placed together in a container that conforms to subsection (2) of this section for storage and transfer to a certified third-party lab.

(4) Certified third-party laboratories may reject a sample if they believe the sample was not collected in the manner required by this section, has been adulterated in any way, contaminated with known or unknown solvents, or was manipulated in a way that violates the sampling protocols.

(5) The WSLCB or its designee will take immediate disciplinary action against any licensee or certified third-party lab which fails to comply with the provisions of this section or falsifies records related to this section including, without limitation, revoking the license or certificate of the licensed producer or processor, or certified third-party lab.

~~((13))~~ (14) No lot of usable flower, batch of marijuana concentrate, or batch of marijuana-infused product may be sold or transported until the completion of all required quality assurance testing. Business entities with multiple locations licensed under the same UBI number may transfer marijuana products between the licensed locations under their UBI number prior to quality assurance testing.

~~((14))~~ (15) Any usable marijuana or marijuana-infused product that passed the required quality assurance tests may be labeled as "Class A." Only "Class A" usable marijuana or marijuana-infused product will be allowed to be sold.

~~((15))~~ (16) Upon approval of the ~~((board))~~ WSLCB, a lot that fails a quality assurance test and the associated trim, leaf and other usable material may be used to create extracts using hydrocarbon or CO₂ closed loop system. After processing, the CO₂ or hydrocarbon based extract must still pass all required quality assurance tests in WAC 314-55-102.

~~((16))~~ (17) At the request of the producer or processor, the ~~((board))~~ WSLCB may authorize a retest to validate a failed test result on a case-by-case basis. All costs of the retest will be borne by the producer or the processor.

~~((17))~~ (18) Labs must report all required quality assurance test results directly into ~~((LCB's))~~ the WSLCB's seed to sale traceability system within twenty-four hours of completion. Labs must also record in the seed to sale traceability system an acknowledgment of the receipt of samples from producers or processors and verify if any

unused portion of the sample was destroyed or returned to the licensee.

(2) Processors may use the hydrocarbons N-butane, isobutane, propane, or heptane or other solvents or gases exhibiting low to minimal potential human health-related toxicity approved by the ~~((board))~~ WSLCB. These solvents must be of at least ninety-nine percent purity and a processor must use them in a professional grade closed loop extraction system designed to recover the solvents, work in an environment with proper ventilation, controlling all sources of ignition where a flammable atmosphere is or may be present.

(3) Processors may use a professional grade closed loop CO₂ gas extraction system where every vessel is rated to a minimum of six hundred pounds per square inch. The CO₂ must be of at least ninety-nine percent purity.

(4) Closed loop systems for hydrocarbon or CO₂ extraction systems must be commercially manufactured and bear a permanently affixed and visible serial number.

(5) Certification from a licensed engineer must be provided to the ~~((liquor control board))~~ WSLCB for professional grade closed loop systems used by processors to certify that the system was commercially manufactured, safe for its intended use, and built to codes of recognized and generally accepted good engineering practices, such as:

- (a) The American Society of Mechanical Engineers (ASME);
- (b) American National Standards Institute (ANSI);
- (c) Underwriters Laboratories (UL); or
- (d) The American Society for Testing and Materials (ASTM).

~~((+5))~~ (6) The certification document must contain the signature and stamp of a professional engineer and the serial number of the extraction unit being certified.

(7) Professional closed loop systems, other equipment used, the extraction operation, and facilities must be approved for their use by

the local fire code official and meet any required fire, safety, and building code requirements specified in:

- (a) Title 296 WAC;
- (b) Chapters 51-51 and 51-54A WAC;
- (c) National Fire Protection Association (NFPA) standards;

~~((+e))~~ (d) International Building Code (IBC);

~~((+d))~~ (e) International Fire Code (IFC); and

~~((+e))~~ (f) Other applicable standards including following all applicable fire, safety, and building codes in processing and the handling and storage of the solvent or gas.

~~((+6))~~ (8) Processors may use heat, screens, presses, steam distillation, ice water, and other methods without employing solvents or gases to create kief, hashish, bubble hash, or infused dairy butter, or oils or fats derived from natural sources, and other extracts.

~~((+7))~~ (9) Under WAC 314-55-077, infused dairy butter and oils or fats derived from natural sources may be used to prepare infused edible products, but they may not be prepared as stand-alone edible products for sale.

~~((+8))~~ (10) Processors may use food grade glycerin, ethanol, and propylene glycol solvents to create extracts. All ethanol must be removed from the extract in a manner to recapture the solvent and ensure that it is not vented into the atmosphere.

~~((+9))~~ (11) Processors creating marijuana extracts must develop standard operating procedures, good manufacturing practices, and a training plan prior to producing extracts for the marketplace. Any person using solvents or gases in a closed looped system to create marijuana extracts must be fully trained on how to use the system, have direct access to applicable material safety data sheets and handle and store the solvents and gases safely.

(c) Nothing herein shall prevent a licensee from the continued cultivation or harvesting of the marijuana subject to the administrative hold. All marijuana, usable marijuana, marijuana concentrate, and marijuana-infused products subject to the administrative hold must be put into separate harvest batches from product not subject to the administrative hold.

(d) Following an investigation, the (~~liquor control board~~) WSLCB may lift the administrative hold, order the continuation of the administrative hold, or seek a final agency order for the destruction of the marijuana, usable marijuana, marijuana concentrate, and marijuana-infused products.

(c) The grant of relief will not substantially harm other parties to the proceedings; and

(d) The threat to the public health, safety, or welfare is not sufficiently serious to justify continuation of the suspension, or that modification of the terms of the suspension will adequately protect the public interest.

(4) The initial order on stay shall be effective immediately upon service unless another date is specified in the order.

AMENDATORY SECTION (Amending WSR 13-21-104, filed 10/21/13, effective 11/21/13)

AMENDATORY SECTION (Amending WSR 15-11-107, filed 5/20/15, effective 6/20/15)

WAC 314-55-515 What are the penalties if a marijuana license holder violates a marijuana law or rule? (1) The purpose of WAC 314-55-515 through 314-55-540 is to outline what penalty a marijuana licensee can expect if a licensee or employee violates a ((~~liquor control board~~)) WSLCB law or rule. (WAC rules listed in the categories provide reference areas, and may not be all inclusive. Any violation not listed in WAC 314-55-515 through 314-55-540 will be assessed following penalty progression of the license type group associated with the class of license.)

(2) Penalties for violations by marijuana licensees or employees are broken down into four categories:

(a) Group One—Public safety violations, WAC 314-55-520.

(b) Group Two—Regulatory violations, WAC 314-55-525.

(c) Group Three—License violations, WAC 314-55-530.

(d) Group Four—((Producer)) Nonretail violations involving the manufacture, supply, processing, and/or distribution of marijuana by nonretail licensees and prohibited practices between nonretail licensees and retail licensees, WAC 314-55-535.

(e) Group Five—Violations involving the transportation freight of marijuana, WAC 314-55-537.

(3) For the purposes of chapter 314-55 WAC, a three-year window for violations is measured from the date one violation occurred to the date a subsequent violation occurred.

(4) Penalties for violation committed by marijuana processor only licensees will be assessed following the penalty progression prescribed for tier 2 marijuana producers.

(5) The following schedules are meant to serve as guidelines. Based on mitigating or aggravating circumstances, the (~~liquor control board~~) WSLCB may impose a different penalty than the standard penalties outlined in these schedules. Based on mitigating circumstances, the (~~board~~) WSLCB may offer a monetary option in lieu of suspension, or alternate penalty, during a settlement conference as outlined in WAC 314-55-510(3).

(a) Mitigating circumstances	(b) Aggravating circumstances
Mitigating circumstances that may result in fewer days of suspension and/or a lower monetary option may include demonstrated business policies and/or practices that reduce the risk of future violations.	Aggravating circumstances that may result in increased days of suspension, and/or increased monetary option, and/or cancellation of marijuana license may include business operations or behaviors that create an increased risk for a violation and/or intentional commission of a violation.
Examples include:	Examples include:
• Having a signed acknowledgment of the business' responsible handling and sales policies on file for each employee;	• Failing to call 911 for local law enforcement or medical assistance when requested by a customer, (a liquor control board) <u>WSLCB</u> officer, or when people have sustained injuries.

Issue Paper

Alcohol Impact Area Rules

Date: March 23, 2016

Presented by: Karen McCall, Agency Rules Coordinator

Description of the Issue

The purpose of this Issue Paper is to request approval from the Board to file proposed rules (CR 102) to revise WAC 314-12-215 Alcohol Impact Areas.

Why is rule making necessary?

The Washington Beer & Wine Distributors Association (WBWDA) submitted a petition for rulemaking to revise WAC 314-12-215 Alcohol Impact Areas.

Background

Over the past several months, board staff held meetings with local governments through the Association of Washington Cities (AWC) and met with representatives from the Washington Beer & Wine Distributors Association (WBWDA). Based on those meetings staff revised the AIA rules as noted below.

What changes are being proposed?

WAC 314-12-155 Alcohol impact areas-Definitions-Guidelines.

- Clarification of minimum requirements for an alcohol impact area recognition packet;
- Clarification on conditions or restrictions the board may recognize for an alcohol impact area;
- Removal of a minimum alcohol content on restricted products;
- Revisions to the reporting requirements for a local jurisdiction on recognized alcohol impact areas; and
- Clarification of information required in reports to the board from local authorities on recognized alcohol impact areas.

WAC 314-12-215 Alcohol impact areas—Definition—Guidelines. (1) What is an alcohol impact area(~~, and how is it different~~)?)

(a) An alcohol impact area is a geographic area located within a city, town or county, and that is adversely affected by chronic public inebriation or illegal activity associated with liquor sales or consumption.

(b) The board may place special conditions or restrictions upon off-premises sales privileges, liquor products, applicants, license assumptions or licensees that sell liquor for off-premises consumption (see subsection (3) of this section).

(c) The board applies a unique investigative and review process when evaluating liquor license applications, license assumptions or renewals for businesses located in an alcohol impact area.

(2) **How is an alcohol impact area formed?** A local authority (that is, a city, town or county) must first designate an alcohol impact area by ordinance and make good faith efforts for at least six months to mitigate the effects of chronic public inebriation with such ordinance before petitioning the board to recognize an alcohol impact area. The board must recognize an alcohol impact area before any unique review process, condition or restriction described in this rule may be applied. A local authority must meet certain conditions to achieve board recognition of an alcohol impact area.

(a) The geographic area of an alcohol impact area must not include the entire (~~territory~~) geographic area under the jurisdiction of a local authority. However, when a local authority designates a street as a boundary, the board encourages that the local authority include both sides of the street for greater effectiveness.

(b) The local authority ordinance must explain the rationale of the proposed boundaries, and describe the boundaries in such a way that:

(i) The board can determine which liquor licensees are in the proposed alcohol impact area; and

(ii) The boundaries are understandable to the public at large.

(c) A local authority must:

(i) Submit findings of fact that demonstrate a need for an alcohol impact area and how chronic public inebriation or illegal activity associated with liquor sales or consumption within a proposed alcohol impact area:

(A) Contributes to the deterioration of the general quality of life within an alcohol impact area; or

(B) Threatens the welfare, health, peace or safety of an alcohol impact area's visitors or occupants;

(ii) Submit findings of fact that demonstrate a pervasive pattern of public intoxication or public consumption of liquor as documented in: Crime statistics, police reports, emergency medical response data, detoxification reports, sanitation reports, public health records, (~~other similar records,~~) community group petitions, public testimony or testimony by current or former chronic public (~~inebriants;~~

~~(iii)~~) inebriates.

(d) Minimum requirements for an alcohol impact area petition packet:

(i) Litter/trash survey and documented results. A litter/trash survey must be conducted within the proposed alcohol impact area boundaries for at least a four week period. Litter/trash surveys must be completed a minimum of twice a week. Use a GIS data map, or similar tool, to point out the "hot spots" of heavy alcohol consumption based on the litter/trash survey. Provide a list of alcohol products found in the litter/trash survey.

(ii) Photographic evidence of litter and drinking in public.

(iii) Law enforcement testimonial(s). Law enforcement testimonial must be from at least one law enforcement officer who frequently works within the proposed alcohol impact area boundaries. A testimonial must discuss the impact of high alcohol content or volume products within the proposed alcohol impact area boundaries and how implementation of an alcohol impact area would benefit the community.

(iv) Letters of support submitted by neighborhood councils, local agencies, schools or universities, business associations, fire departments, local businesses, and private citizens in the community.

(v) Crime statistics and police reports. Crime statistics and police reports must show the statistics for alcohol-related criminal activity within the proposed alcohol impact area boundaries, and must show evidence linking specific products with chronic public inebriation activity.

(e) After reviewing the alcohol impact area petition packet, the board may request supplemental materials to prove the necessity of an alcohol impact area. The supplemental materials may include:

(i) Additional testimonials submitted by citizens who would be directly affected by the proposed alcohol impact area.

(ii) Emergency medical response data. This information must provide evidence that chronic inebriation within the proposed alcohol impact area requires an abnormally high amount of medical emergency care.

(iii) Sanitation reports. This information must provide evidence that chronic inebriation within the proposed alcohol impact area boundaries creates an abnormally high amount of sanitation problems.

(iv) Detoxification reports. This information must provide evidence that chronic inebriation within the proposed alcohol impact area requires an abnormally high amount of detoxification services.

(f) Submit documentation that demonstrates a local authority's past good faith efforts to control the problem through voluntary measures (see subsection (4) of this section)(

~~(iv) Explain why past voluntary measures failed to sufficiently resolve the problem; and~~

~~(v))~~. The voluntary compliance report must:

(i) Provide an executive summary of the results of the voluntary compliance period;

(ii) Provide evidence of the local authorities' efforts to control the problem through voluntary measures; and

(iii) Explain why the voluntary measures were not effective and how mandatory restrictions will help address the problem.

(g) Request additional conditions or restrictions and explain how the conditions or restrictions will reduce chronic public inebriation or illegal activity associated with off-premises sales or liquor consumption (see subsection (3) of this section).

(3) What conditions or restrictions may the board recognize for an alcohol impact area?

(a) Restrictions may include, but are not limited to:

(i) Limitations on business hours of operation for off-premises liquor sales;

(ii) Restrictions on off-premises sale of certain liquor products within an alcohol impact area; ~~((e))~~ and

(iii) Restrictions on container sizes available for off-premises sale.

(b) Requests for product restrictions (for example, prohibition of sale of certain liquor products or container sizes) must originate from a local authority's law enforcement agency or public health authority, whereas restrictions affecting business operations (for example, hours of operation) may originate from a local authority's law enforcement agency, public authority or governing body. ~~((e))~~ Product restrictions must be reasonably linked to problems associated with chronic public inebriation or illegal activity. Reasonable links include, but are not limited to: Police, fire or emergency medical response statistics; photographic evidence; law enforcement, citizen or medical-provider testimonial; testimony by current or former chronic public ~~((inebriants))~~ inebriates; litter pickup; or other statistically documented evidence that a reasonable person may rely upon to determine whether a product is associated with chronic public inebriation or illegal activity~~((-~~

~~(d) Restricted beer and wine products must have minimum alcohol content of five and seven-tenths percent by volume and twelve percent by volume, respectively.~~

~~(e))~~; or

(c) Upon board approval and upon an individual product by individual product basis, a local authority may restrict a product that is already restricted in another board-recognized alcohol impact area provided that a product is significantly materially similar (for example, comparable alcohol percent content, container size or liquor category ~~((such as alcoholic energy drinks))~~) to products already restricted in its own alcohol impact area. Upon board approval and upon an individual product by individual product basis, a local authority may also restrict a product that is significantly materially similar to products already restricted in its own alcohol impact area. In both cases, a local authority must demonstrate to the board, in writing, the material similarities and need for product inclusion, but the board will not require a local authority to submit extensive documented evidence as described in ~~((e))~~ (b) of this subsection.

~~((f))~~ (d) A local authority may propose the removal of a condition, restriction or product from its alcohol impact area's restricted product list provided that a local authority demonstrates its reason (such as, a product is no longer produced or bottled) to the board in writing.

(4) What types of voluntary efforts must a local authority attempt before the board will recognize an alcohol impact area?

(a) A local authority must notify all off-premises sales licensees in a proposed alcohol impact area that:

(i) Behavior associated with liquor sales and associated illegal activity is impacting chronic public inebriation; and

(ii) Existing voluntary options are available to them to remedy the problem.

(b) A local authority's efforts must include additional voluntary actions. Examples include, but are not limited to:

(i) Collaborative actions with neighborhood citizens, community groups or business organizations to promote business practices that reduce chronic public inebriation;

(ii) Attempts to achieve voluntary agreements with off-premises sales licensees to promote public welfare, health, peace or safety;

(iii) Requesting licensees to voluntarily (~~discontinuing to sell~~ a)) discontinue selling products that are considered contributing to the problem;

(iv) Distribution of educational materials to chronic public inebriants or licensees;

(v) Detoxification services;

(vi) Business incentives to discourage the sale of problem products; or

(vii) Change in land use ordinances.

(c) A local authority must implement these voluntary agreements for at least six months before a local authority may present documentation to the board that voluntary efforts failed to adequately mitigate the effects of chronic public inebriation and need augmentation.

(5) What will the board do once it recognizes an alcohol impact area?

(a) The board will notify, in a timely manner, the appropriate liquor distributors of the product restrictions.

~~(b) ((No state liquor store or agency located within an alcohol impact area may sell that alcohol impact area's restricted products.~~

~~(c))~~ The board will notify, in a timely manner, all off-premises sales licensees in a proposed or existing alcohol impact area whenever the board recognizes, or recognizes changes to, an alcohol impact area (see subsection (7) of this section).

(6) What is the review process for liquor license applications, license assumptions, and renewals inside an alcohol impact area?

(a) When the board receives an application for a new liquor license or a license assumption that includes an off-premises sales privilege, the board will establish an extended time period of sixty calendar days for a local authority to comment upon the application.

(i) A local authority may, and is encouraged to, submit comment before the end of a comment period. A local authority may request an extension of a comment period when unusual circumstances, which must be explained in the request, require additional time for comment.

(ii) A local authority will notify a licensee or applicant when a local authority requests the board to extend a sixty-day comment period.

(b) For renewals, the board will notify a local authority at least ninety calendar days before a current license expires. The same requirements in (a)(i) and (ii) of this subsection apply to the ninety-day comment period for problem renewals. For the purposes of this section, a problem renewal means a licensee, a licensed business or a licensed location with a documented history of noncompliance or illegal activity.

(7) When and for how long will an alcohol impact area be in effect, and may an alcohol impact area be changed?

(a) An alcohol impact area takes effect on the day that the board passes a resolution to recognize an alcohol impact area. However, product prohibitions take effect no less than thirty calendar days after the board passes such resolution in order to give retailers and distributors sufficient time to remove products from their inventories.

(b) An alcohol impact area remains in effect until:

(i) A local authority repeals the enabling ordinance that defines an alcohol impact area;

(ii) A local authority requests that the board revoke its recognition of an alcohol impact area;

(iii) The board repeals its recognition of an alcohol impact area of its own initiative and following a public hearing; or

(iv) A local authority fails to comply with subsection (8) of this section.

(c) A local authority may petition the board to modify an alcohol impact area's geographic boundaries, repeal or modify an existing condition or restriction, or create a new condition or restriction. The board may agree to do so provided that a local authority shows good cause and submits supporting documentation ~~((+see))~~ as contained in subsections (2) and (3) of this section(+).

(d) Prohibition of a new product added to an existing prohibited products list takes effect no ~~((less))~~ sooner than thirty calendar days following the board's recognition of a modified prohibited products list.

(8) Reporting requirements and five-year assessments.

(a) A year after the implementation of the alcohol impact area a local authority shall submit ~~((annual))~~ a report~~((s))~~ to the board that clearly demonstrates the intended effectiveness of an alcohol impact area's conditions or restrictions. The report~~((s-are))~~ is due no later than sixty calendar days following ~~((each anniversary of the board's recognition of an))~~ the first anniversary of the implementation of the alcohol impact area. The report must include the same categories of information and statistics that were originally used to request the alcohol impact area.

(b) The board will conduct an assessment of an alcohol impact area once every five years following the fifth, tenth, fifteenth, et cetera, anniversary of the board's recognition of ~~((an))~~ the alcohol impact area. The five-year assessment process is as follows:

(i) ~~Within ~~((ten))~~ twenty~~ calendar days of receiving a local authority's fifth, tenth, fifteenth, et cetera, ~~((annual))~~ report, the board shall notify affected parties of the upcoming assessment, whereupon an affected party has twenty calendar days to comment upon, or petition the board to discontinue its recognition of, an alcohol impact area (see (d) of this subsection). Affected parties may include, but are not limited to: Liquor licensees, citizens or neighboring local authorities.

(ii) An affected party may submit a written request for one twenty calendar-day extension of the comment/petition period, which the board may grant provided that an affected party provides sufficient reason why he or she is unable to meet the initial twenty-day deadline.

(iii) The board will complete an assessment within sixty calendar days following the close of the final comment/petition period.

(c) An assessment shall include an analysis of:

(i) The same categories of information and statistics that were originally used to request the alcohol impact area; and

(ii) Comments or petitions submitted by affected parties~~((+and~~

~~((ii) Each annual report submitted during a five year period)).~~

An assessment ~~((shall))~~ may also include modifications that a local authority must make to an alcohol impact area as required by the board, or the board's reasons for revoking recognition of an alcohol impact area.

(d) To successfully petition the board to discontinue its recognition of an alcohol impact area, an affected party must:

(i) Submit findings of fact that demonstrate how chronic public inebriation((7)) or illegal activity associated with liquor sales or consumption((7)) within a proposed alcohol impact area does not or no longer:

(A) Contributes to the deterioration of the general quality of life within an alcohol impact area; or

(B) Threatens the welfare, health, peace or safety of an alcohol impact area's visitors or occupants;

Issue Paper

Emergency Rules for Marijuana Recalls

Date: March 23, 2016

Presented by: Joanna Eide, Policy and Rules Coordinator

Description of the Issue

The purpose of this Issue Paper is to request approval from the Board to file emergency rules to create a marijuana recall process for marijuana and marijuana products that pose a risk to public health and safety.

Why is rule making necessary?

Emergency rules are needed to create a recall process for marijuana and marijuana products that pose a risk to public health and safety. Marijuana and marijuana products sold in WSLCB licensed retail stores are a consumable product and it is important that they are safe for human consumption. In the event that product posing a risk to public health is discovered, regulations and a process need to be in place to allow for affected product to be identified and removed from the marketplace in a fast and efficient manner.

Process

The emergency rules are necessary for the preservation of the public health, safety, and general welfare. The rule becomes effective upon filing with the Code Reviser's Office and will expire July 21, 2016, 120 days after filing. The WSLCB also requests to file a CR 101 to initiate permanent rulemaking on this topic. The WSLCB will request that the emergency rule be refilled should the emergency rule expire prior to the effective date of permanent rules, which WSLCB will be requesting permission to initiate at this meeting.

What are the changes?

New Section. WAC 314-55-225 Marijuana recalls.

The emergency rule creates a process for marijuana recalls. Staff drafted this process to mirror the process WSDA uses for food product recalls and used information compiled from researching how WSDA, Dept. of Health, and the FDA conduct recalls. The rule outlines:

- When licensees may conduct a market withdrawal in cases where they wish to pull pack products that does not involve a risk to public health and safety;
- When a recall is required and the steps a licensee must take to recall and destroy affected products; and
- When the WSLCB may seek a Board-directed recall and an order for destruction of products.

New emergency rules are needed to establish a marijuana and marijuana product recall process and requirement. These rules will protect the health and welfare of marijuana consumers in the state of Washington.

The emergency rule is similar to the process WSDA uses for food product recalls and used information compiled from researching how WSDA, Dept. of Health, and the FDA conduct recalls. The rule outlines:

- When licensees may conduct a market withdrawal in cases where they wish to pull pack products that does not involve a risk to public health and safety;
- When a recall is required and the steps a licensee must take to recall and destroy affected products; and
- When the WSLCB may seek a Board-directed recall and an order for destruction of products.

The emergency rules are necessary for the preservation of the public health, safety, and general welfare. The rule becomes effective upon filing with the Code Reviser's Office and will expire July 21, 2016, 120 days after filing.

The emergency rules will become part of the permanent rulemaking the WSLCB is requesting the Board initiate if approval to file a CR 101 is granted.

Process

The Rules Coordinator requests approval to file the Emergency Rules described above. An issue paper on these rule was presented at the Board meeting on March 23, 2016, and is attached to this order.

If approved for filing, the tentative timeline for the rule making process is outlined below:

Marijuana Recall Rules

Date: March 23, 2016

Presented by: Joanna Eide, Policy and Rules Coordinator

Description of the Issue

The purpose of this Issue Paper is to request approval from the Board to file the first stage of rulemaking (CR 101) to create a new section addressing marijuana recalls in Chapter 314-55 WAC Marijuana Licenses, Application Process, Requirements, and Reporting.

Why is rule making necessary?

A new rule is needed to create a recall process for marijuana and marijuana products that pose a risk to public health and safety. Marijuana and marijuana products sold in WSLCB licensed retail stores are a consumable product and it is important that they are safe for human consumption. In the event that product posing a risk to public health is discovered, regulations and a process need to be in place to allow for affected product to be identified and removed from the marketplace in a fast and efficient manner.

Process

The rule making process begins by announcing LCB's intent to add and make changes to existing rules by filing a CR 101 form. This allows staff and stakeholders to begin discussing necessary rule changes. At the CR 101 stage of the process, no proposed language is offered. The public may comment on the subject of this rulemaking during the designated comment period. Notice will be sent to all who have indicated that they want to receive notice of rule changes. The notice will identify the public comment period and where comments can be sent. Based on public input received, staff will draft proposed changes for presentation to the Board at the next phase of the rule making process.

Subject: **Approval for filing a pre-proposal statement of inquiry (CR 101) to create a new section in Chapter 314-55 Marijuana Licenses, Application Process, Requirements, and Reporting.**

New rules are needed to establish a marijuana and marijuana product recall process and requirement. In the event that product posing a risk to public health is discovered, regulations and a process need to be in place to allow for affected product to be identified and removed from the marketplace in a fast and efficient manner. The WSLCB will propose permanent rules to establish a recall process similar to those food recall processes of other state and federal agencies. These rules will protect the health and welfare of marijuana consumers in the state of Washington.

Process

The Rules Coordinator requests approval to file the pre-proposal statement of inquiry (CR 101) for the rule making described above. An issue paper on this rule was presented at the Board meeting on March 23, 2016, and is attached to this order.

If approved for filing, the tentative timeline for the rule making process is outlined below:

March 23, 2016	Board is asked to approve filing the pre-proposal statement of inquiry (CR 101)
April 6, 2016	Code Reviser publishes notice, LCB sends notice to rules distribution list
May 18, 2016	End of written comment period
May 18, 2016	Board is asked to approve filing the proposed rules (CR 102 filing)

June 1, 2016	Code Reviser publishes notice, LCB sends notice to rules distribution list
June 29, 2016	Public Hearing held
June 29, 2016	End of written comment period
July 13, 2016	Board is asked to adopt rules
July 13, 2016	Agency sends notice to those who commented both at the public hearing and in writing.

NEW SECTION

WAC 314-55-225 Marijuana recalls. (1) **Definitions.** For the purposes of this section, the following definitions apply:

(a) "Affected product" means marijuana, usable marijuana, marijuana concentrates, or marijuana-infused products subject to a recall.

(b) "Affected licensee" means a licensee whose marijuana, usable marijuana, marijuana concentrates, or marijuana-infused products are subject to a recall. More than one licensee may be an affected licensee in a recall.

(2) **Exempt market withdrawals.**

(a) A licensee may withdraw from the market marijuana, usable marijuana, marijuana concentrates, or marijuana-infused products by its own determination for reasons that do not pose a risk to public health and safety such as for aesthetic reasons or other similar deficiencies in product or packaging.

(b) If a licensee initiates a market withdrawal for a reason that does not pose a risk to public safety, the licensee must notify the WSLCB by contacting the local WSLCB enforcement officer assigned to the local area within forty-eight hours of beginning the market withdrawal. Licensees withdrawing marijuana, usable marijuana, marijuana concentrates, or marijuana-infused products for reasons other than public health and safety under (a) and (b) of this subsection are exempt from the remaining requirements of this section.

(3)(a) **When a recall is required.** A recall is required when circumstances exist that pose a risk to public health and safety. Factors that contribute to a determination of a recall situation include, but are not limited to, the following:

(i) Evidence that pesticides not approved by the board were used or are present on marijuana plants; or

(ii) Evidence of another condition that poses a risk to public health or safety.

(b) **Licensee-initiated recalls.**

(i) If a licensee initiates a recall due to a condition that poses a risk to public safety and would make a recall appropriate under this subsection (3), the licensee must:

(A) Immediately notify the local WSLCB enforcement officer; and

(B) Secure, isolate, and prevent the distribution of all marijuana, usable marijuana, marijuana concentrates, or marijuana-infused products that may have been exposed to the condition warranting the recall. The licensee is prohibited from destroying any affected product prior to notifying the WSLCB and coordinating with the local WSLCB officer on destruction activities.

(ii) If the WSLCB determines the licensee fails to engage in recall efforts that meet the urgency of the risk to public health and safety, the WSLCB may seek a board-directed recall as provided in this section depending on the circumstances.

(c) **WSLCB investigation-initiated recalls.**

(i) If the WSLCB determines that a recall is not appropriate after an investigation, the WSLCB enforcement division may release administrative holds placed on marijuana, usable marijuana, marijuana concentrates, or marijuana-infused products as part of the investigation as appropriate, unless an administrative hold is necessary under a continuing investigation.

(ii) If the WSLCB determines that a recall is appropriate after an investigation, the WSLCB notifies the board and requests the board

issue a recall. If the board issues a recall, the WSLCB notifies the affected licensee that is the source of the issue giving rise to a recall.

(d) **Recall plans.** An affected licensee must develop a recall plan in a timely manner that sets the procedures for the recall of affected product. If the affected licensee distributed affected product to consumers or to retailers, the affected licensee must immediately notify all licensees that received affected product, and issue a press release and other appropriate public notification to inform consumers of the recall and identifying information about the affected product recalled.

(i) A recall plan must include, at a minimum, the following:

(A) Designation of a member of the licensee's staff who serves as the licensee's recall coordinator;

(B) Procedures for identifying and isolating product to prevent or minimize its distribution to consumers;

(C) Procedures to retrieve and destroy product; and

(D) A communications plan to notify those affected by the recall, including:

(I) How the affected licensee will notify other licensees in possession of product subject to the recall; and

(II) The use of press releases and other appropriate notifications to ensure consumers are notified of the recall and affected product information if the affected product was distributed to consumers.

(ii) A recall must follow the procedures outlined in the recall plan unless otherwise agreed by the WSLCB and the licensee. The affected licensee must ensure recall procedures are conducted to maximize recall of affected product and minimize risks to public health and safety.

(e) **Destruction of affected product.** An affected licensee must coordinate destruction of affected product with the local WSLCB enforcement officer and allow WSLCB enforcement to oversee the destruction of affected product recalled to ensure the destruction of affected product that poses risks to public health and safety.

(f) **Recall reports and audit.** The affected licensee must track the total amount of affected product and the amount of affected product returned to the affected licensee as part of the recall effort. The affected licensee must report to the WSLCB periodically on the progress of the recall efforts. The periodic reports must occur at a minimum of once a week or as otherwise specified and agreed to by the WSLCB and the affected licensee in the recall plan.

(g) **Recall closure.** If the WSLCB determines that the recall efforts are successful and risks to public health and safety are no longer present, the WSLCB may recommend closure of the recall to the board.

(4) **Board-directed recall.**

(a) Upon the recommendation by the WSLCB enforcement division, the board may issue a directed recall if:

(i) The affected licensee does not comply with a recall under subsection (3) of this section;

(ii) The affected licensee does not comply with the recall plan or recall reporting requirements under subsection (3) of this section; or

(iii) The WSLCB enforcement division determines that affected product may be diverted or is being diverted from the licensed business, or another circumstance that makes the affected licensee's de-

struction of the product inadvisable or a risk to public health and safety.

(b) If the board issues a directed recall, the WSLCB will notify consumers of the recall and all licensees that may possess product affected by the recall if notice has not yet occurred.

(c) Under a directed recall, the WSLCB enforcement division may seek an order for destruction of the affected product from the board.

(i) If the board issues an order for destruction, the WSLCB enforcement division may seize and conduct the destruction of affected product.

(ii) An order for destruction will include notice to the licensee and opportunity for hearing before destruction, unless there is evidence of an immediate danger to public health, safety, or welfare to justify an immediate order for destruction, with an opportunity for an expedited hearing after the destruction.

(d) If a destruction order is issued and the WSLCB seizes product affected by the recall and conducts the destruction of the product, the affected licensee may be responsible for reimbursing the WSLCB for costs associated with product destruction.

(e) If the board finds that an immediate danger to the public health, safety, or welfare requires immediate WSLCB action, a licensee may also be subject to summary suspension under RCW 66.08.150(4).

(5) The WSLCB will maintain a recall web page on its web site of all current and closed recalls of record.

Marijuana Recalls

Washington State Liquor and Cannabis Board

March 23, 2016

Background

- WSLCB has discovered instances where unauthorized pesticides were used on marijuana plants and detected on marijuana products
- A recall procedure is needed to address instances where products pose a risk to public health and safety including
 - Unauthorized pesticides found on marijuana; and
 - Other conditions that pose a risk to public health and safety

How the recall process was developed

- Researched other state and federal agencies' recall procedures
- Other states' marijuana recall procedures:
 - Colorado: November 2015 Executive Order
 - Oregon: Developing rules. Temporary rules address penalties for “adulterating” product or selling “adulterated” product
- Recalls are largely voluntary and business-driven (i.e. the licensee recalls and destroys product)
- Recall procedures include an option for the agency to step in and conduct the recall and destruction depending on circumstances
- WSLCB recall procedure mirrors WSDA's procedure

The Recall Process – 3 parts

- Market withdrawals
- When a recall is required
- Board-directed recalls

Market Withdrawals

- Market withdrawals
 - Licensee-initiated
 - No public health or safety nexus
 - Done for aesthetic reasons or other similar deficiencies in product or packaging
 - Must notify WSLCB
 - Does not follow the recall process – Licensee withdraws product from the market on its own

When a recall is required

- Involves risk to public health and safety
- Licensee-initiated or WSLCB investigation initiated
 - Mandatory immediate notification of WSLCB if licensee-initiated
 - Licensee must secure, isolate, and prevent the distribution of affected product if licensee-initiated
 - If WSLCB investigation initiated, administrative hold continues
 - Follows the same recall process in both cases

When a recall is required (cont'd)

- Licensee is responsible for recalling product
- Recall plan must be developed and followed
 - Licensee creates, minimum requirements in rule
 - WSLCB will provide a sample recall plan for licensees to use to create plans
 - Recall plans will be developed on an as-needed basis until permanent rules are finalized
 - Recall plans will be required for all licensees in permanent rules
- Licensee destroys recalled product under WSLCB observation
- Recall reports, audits, and closure

Board-Directed Recall

- Used in instances where the licensee does not comply with a recall or if substantial risk to public health and safety exists
- WSLCB Enforcement seeks destruction order and conducts destruction of product if approved
- Due Process
