

ACCELA ONLINE SUBMISSION FAILURE

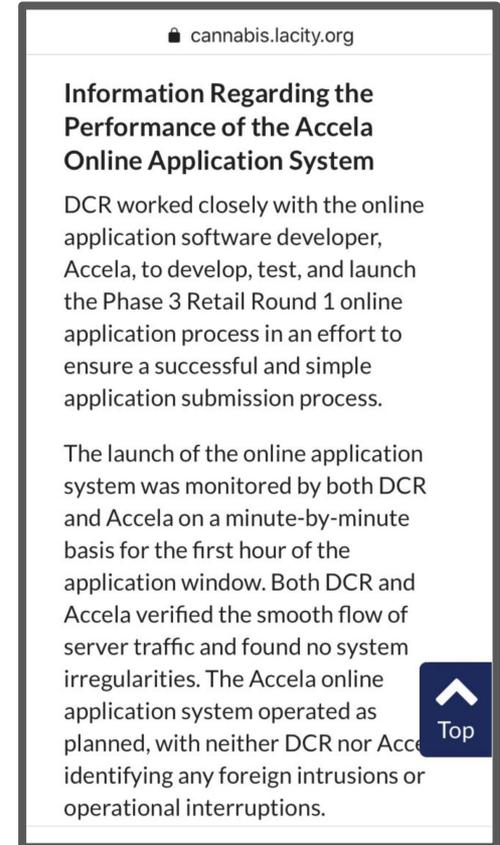

CITY OF LOS ANGELES SOCIAL EQUITY
PHASE 3 RETAIL ROUND 1

DCR STATEMENT REGARDING PERFORMANCE OF ONLINE APPLICATION

“Both DCR and Accela verified the smooth flow of server traffic and found no system irregularities. The Accela online application system operated as planned, with neither DCR nor Accela identifying any foreign intrusions or operational interruptions.”

After nearly two years of delays and setbacks, the City of Los Angeles Social Equity Program has succumbed to public corruption. first round of Phase 3 Commercial Cannabis Licensing for 100 Social Equity retail storefront dispensaries. This phase of licensing was intended to prioritize victims of the failed **WAR ON DRUGS**.

The following evidence creates reasonable doubt that the application system “operated as planned” and that the process was subverted by data manipulation.

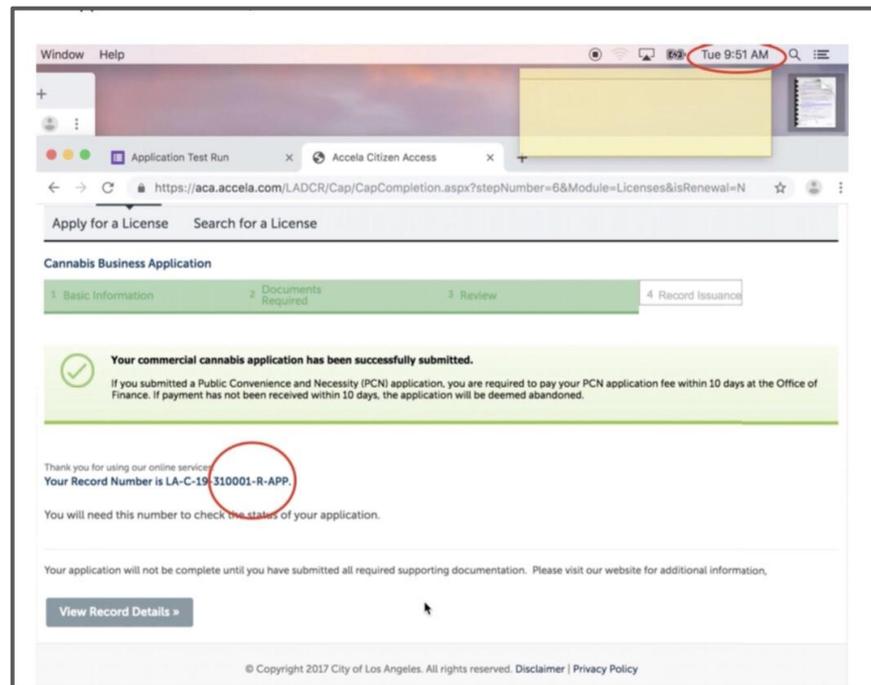

The screenshot shows a webpage from cannabis.lacity.org. The title is "Information Regarding the Performance of the Accela Online Application System". The text on the page reads: "DCR worked closely with the online application software developer, Accela, to develop, test, and launch the Phase 3 Retail Round 1 online application process in an effort to ensure a successful and simple application submission process." Below this, it says: "The launch of the online application system was monitored by both DCR and Accela on a minute-by-minute basis for the first hour of the application window. Both DCR and Accela verified the smooth flow of server traffic and found no system irregularities. The Accela online application system operated as planned, with neither DCR nor Accela identifying any foreign intrusions or operational interruptions." There is a "Top" button in the bottom right corner of the screenshot.

FAILURE #1: ACELA SYSTEM OPENED EARLY

A Social Equity Applicant successfully submitted his online application at *9:51am, Tuesday morning of September 3rd. MORE THAN 8 MINUTES BEFORE OFFICIAL 10AM SYSTEM OPENING.

The person completed the application and pressed submit which triggered the assignment of Record ID #001. It was the first application submitted, well before the stated 10am start time.

*SCREEN RECORDING AVAILABLE

FAILURE #2: BREACH OF PUBLIC TRUST

On September 26th, the DCR published the Phase 3 Retail Round 1 Submissions list of names and time stamps of all 802 Social Equity applications submitted.

Subsequently, Record #001 was given a false timestamp of 10:01:28 am.

3 of 33 - 9/26/2019

FAILURE #3: NO PROTECTION FROM BOTS OR AUTOMATION

The primary protection against the use of automation or bots is a **CAPTCHA request**.

Multiple applicants screen recordings* show the security feature was **disabled for at least the first 2 minutes** after the application process officially started at 10am, allowing bots to go unblocked.

*SCREEN RECORDINGS AVAILABLE

FAILURE #4: NO PROTECTION FOR SUBMISSION OF MULTIPLE APPLICATIONS

Phase 3 Retail Round 1 Submissions (09/03/19 10am to 09/17/2019 10am)

DCR stated, “Users who attempt to submit multiple applications simultaneously will receive an **error message.**”

The presence of duplicate applications with time stamps indicates the **failure of Accela system to identify/deploy error messages** to submissions that were aided by automation or submitted in parallel under a single user login.

FAILURE #5: MISINFORMATION- CLARIFICATION OF RECORD ID#

This statement by the DCR claiming that Record ID#'s were triggered when application was started is inaccurate.

Screen Recordings* and the list subsequently provided by the DCR show a direct correlation between the Record ID# and the ending time stamp, indicating it was actually triggered when the application was completed.

*SCREEN RECORDINGS AVAILABLE

The screenshot shows a web browser address bar with the URL "cannabis.lacity.org". Below the address bar, the page title is "Clarification of Record ID". The main text explains that hundreds of individuals initiated Phase 3 Retail Round 1 applications, and upon submission, they received a Record ID in the format "LA-C-19-310__-R-APP". It clarifies that the last three digits of the Record ID indicate the order of submission, and provides an example: "LA-C-19-310100-R-APP" would be the one-hundredth applicant. A key point is that the Record ID is assigned at the time of application start, not submission, and therefore does not necessarily reveal the submission order relative to other applications. A "Top" button is visible at the bottom right of the text area.

cannabis.lacity.org

Clarification of Record ID

As expected, hundreds of individuals initiated Phase 3 Retail Round 1 applications within minutes of the application window opening at 10 a.m. Upon submitting their application, an applicant received a Record ID in the following format: LA-C-19-310__-R-APP. Many applicants have assumed that the Record ID, specifically the last three numeric digits, indicates the order in which applications were submitted. For example, an applicant with a Record ID of LA-C-19-310100-R-APP might have assumed they were the one-hundredth applicant to submit an application. This is an incorrect assumption.

Accela assigns an application a Record ID at the time an application is *started*, not when it is *submitted*. Therefore, the Record ID does not necessarily reveal the order in which the application was submitted relative to other applications.

FINDINGS BY EXPERT AUDIT OF ACCELA ONLINE SUBMISSION PROCESS

After a thorough review of the Accela Online Submission process, the following are the findings of an Industry Expert (Chief Design Architect and Data Management Specialist). This Expert possesses an extensive background of over 35 years experience in the design, development and implementation of complex databases.

1) BAD PLANNING: The gap between **screen recording #1** and **screen recording #2** was most likely due to **insufficient resources** for the block of transactions that came in at that moment. SR#2 barely missed the bottleneck but SR#1 hit it. This can be a millisecond difference in. This tells me the City of Los Angeles **did NOT allocate sufficient resources** to the process.

2) DATA MANIPULATION: The first Record ID was assigned prior to 10AM based on the recorded video yet has a posting time recorded well after 10AM. This is a significant issue. The application that got the first Record ID# prior to 10AM was erroneously assigned a posting time of 10:01:29. **This is data manipulation.**

3) RECORD ID# MISINFORMATION: The DCR said that the Record ID was assigned at application start. Yet we have again SR#2 and SR#1 starting the process within the same second yet they got records ID's assigned to them 25 apart. There is video evidence that shows SR#1 got stalled by resource contention about the right amount of time to cause her to get a ID 25 higher than SR#2. **Clearly the record ID's were assigned at the final submit.**

4) INADEQUATE SECURITY FEATURES: In the initial few minutes of the the application process there was **NO "BOT" check (captcha process)** for logging into the system. A full 3 minutes after the start we begin seeing a captcha process implemented. This means that it's **almost impossible to say "No automated processes were used"**.
