**Notes:**

Price, the lowest we found in our survey of pharmacies for each product, is for patients paying out of pocket.

Euros per gram is based on a minimum purchase of 5, 10 or sometimes 15 grams.

Price doesn't include narcotics fees, shipping or any other special fee that might be added.

More products could be available in pharmacies not surveyed by *MJBizDaily*.

"N/A" in the price column doesn't mean the product isn't available. It means we didn't find the product in the specific pharmacies that offer cheaper prices. We found it in only pharmacies charging a much higher price.
