

# **An Important Message to Medical Marijuana Patients**

An important message to medical marijuana patients:

On November 16, 2021, the Department of Health instituted a state-wide review of vaporized products containing added ingredients such as externally sourced flavorings or terpenes. Grower/processors have submitted information regarding these products to the Department for review, to include whether these added ingredients are

safe for inhalation. The Department will review this information as expeditiously as possible. Should the Department's review reveal products containing added ingredients that are not safe for inhalation, those products will be removed from the market. In the interim, you should be aware that products with added ingredients may not be safe for inhalation and you should make your own decision about whether to use these products. If you have any questions or concerns about products, you should consult with your medical professional.
